PROFESSIONAL SUMMARY

AI program and operations leader with experience across 40+ AI data and model-evaluation projects and workstreams at Pareto AI and Scale AI. Coordinated 1,500+ experts across distributed AI engagements, combining quality assurance, workforce enablement, financial controls and workflow automation. Brings 20 years of experience as a technology business founder, connecting technical execution with client priorities, commercial judgment and accountable delivery.

CORE EXPERTISE

Program and project management | AI operations | Large language model (LLM) evaluation | Human-in-the-loop workflows | Reinforcement learning from human feedback (RLHF) | Supervised fine-tuning (SFT) data | Quality assurance and reviewer calibration | Capacity planning | Stakeholder management | Budget management | Risk and issue resolution | Process improvement

PROFESSIONAL EXPERIENCE

Pareto AI | Remote, Brazil | Contract

Expert-led AI data and model-evaluation programs for AI research clients.

Senior Project Manager | May 2026 - Present

- Led a multimillion-dollar legal AI data and evaluation program, coordinating supporting project managers, domain experts and QA across 2,000+ task deliveries, including revisions and follow-on rounds. Managed training, workflow changes and delivery risks.
- Created budget trackers and cost documentation to expose cost drivers, guide execution decisions and support payment review. Identified gaps in payment records before they caused payout delays.
- Built a Google Meet attendance tracker adopted company-wide as a standard operating process, automating attendance and session records for training oversight and payment review.
- Systematically reviewed and improved project guidelines, resolving ambiguities and recurring error patterns to reduce expert errors and strengthen understanding of task requirements. Partnered with Product and Engineering to translate operational needs into platform improvements.
- Safeguarded client delivery commitments through ongoing risk monitoring, early detection of invalid model outputs and quality blockers, and coordinated recovery actions that protected deadlines and QA capacity.
- Onboarded and mentored project managers, sharing delivery practices and structured escalations that connected each issue to its business impact and recommended action.

Project Manager | Jan 2026 - Apr 2026

- Translated client requirements into execution plans, throughput targets, onboarding needs and QA workflows for global AI data programs, coordinating delivery leads, expert onboarding, technical support and operations.
- Managed daily delivery controls across quality, schedule and budget, resolving task-routing and tooling issues to keep specialist workflows moving and stakeholders aligned.

Scale AI | Remote, Brazil

AI training-data and model-evaluation operations across multilingual workflows.

Project Manager | AI Data Operations and Quality | Jul 2024 - Feb 2026

- Managed contributor pipelines involving 400+ experts, balancing capacity, task routing, reviewer readiness and quality across distributed teams. Led and supported high-volume projects exceeding 5,000 deliveries.
- Maintained delivery PDR at approximately 5-6% or lower, below the 10% internal threshold, through targeted coaching, reviewer calibration and resolution of audit disputes.
- Led an investigation into Brazilian Portuguese audit inconsistencies affecting five projects. Gathered evidence and consulted the Brazilian Academy of Letters to challenge erroneous rejections and mitigate rework and commercial risk.
- Built project-specific training, office hours and reviewer guidance from recurring error patterns and rubric changes, strengthening consistency across SFT, preference-ranking, factuality and safety workflows.

Machine Learning Specialist | Feb 2024 - Jul 2024

- Progressed from AI data contributor to the Oracle team in May 2024, handling complex LLM evaluation, prompt testing and human validation of training data before moving into project management.

FORTH | Porto Alegre, Brazil

Founder and Managing Director | Feb 2004 - Feb 2024

- Founded and led an IT infrastructure services business for 20 years, owning client relationships, contract negotiation, budgets, technical delivery and team leadership across concurrent enterprise engagements.
- Delivered data center, network and telecommunications projects for Yara, Nexteer, thyssenkrupp, Taurus and TAP. Coordinated technical teams and vendors, including infrastructure migration to IBM hosting and services.
- Led technical delivery for a public-lighting project covering 7,000+ lighting points in Cachoeira do Sul during 2023-2024.
- Coordinated ground-station standardization and COBHAM aerial-imaging system integration for the 2014 FIFA World Cup, connecting aircraft communications with public-security operations.

EDUCATION AND PROFESSIONAL CREDENTIALS

Bachelor's Degree in Information Systems | ULBRA | 2005 - 2011

Full Stack Python Developer | In progress

Technical Diploma in Electronics | Escola Técnica Santo Inácio

30+ completed courses and assessments in AI operations, quality and leadership

Additional training: Azure Cloud and ITIL service management

Professional registration: Electronics Technician | CRT-RS/CFT; previously CREA-RS

TECHNICAL CAPABILITIES AND LANGUAGES

AI delivery platforms: Agentic Graders, Orchestrator, SRT, RaterHub, CrowdCompute.

Technical operations and analytics: Python, Jupyter, Redash, Metabase, AWS/Azure environments, virtual machine troubleshooting and access control.

Automation and integrations: JavaScript, Google Apps Script, REST APIs, OAuth, GitHub.

English: Full professional proficiency (EF SET C1) | Portuguese: Native | Spanish: Conversational
